INTERPLANETARY INTELLIGENCE REPORT

The Interplanetary Intelligence Report is the official publication of the Interplanetary Intelligence of Unidentified Flying Objects (IIOUFO), with international headquarters located at 3005 West Eubanks, Oklahoma City, Oklahoma. Published bi-monthly, subscription rate of \$3.00 per year, ppd.

VOL. 1—NO. 1

MAY, 1965

PRICE 50c

RESEARCH - INVESTIGATION - ANALYSIS “IIOUFO”

Information appearing in this report may be used providing credit is properly given to the IIOUFO.

State and Foreign Representatives
Members

INFORMATION INVITED

If you have any questions about the IIOUFO, would like to become a representative, or report a UFO sighting, feel free to get in touch with us. All manuscripts, articles, photos, etc., cannot be returned unless the proper postage accompanies the same. We reserve the right to publish all information we receive unless otherwise stated.

EDITORIAL

This is the first issue of "The Interplanetary Intelligence Report", (IIR), and judging by the interest in ufology, it will not be the last. The IIR has been on the drawing boards since 1957 when the Interplanetary Intelligence Of Unidentified Flying Objects, (IIOUFO) was organized for the scientific investigation of unidentified flying objects.

IIOUFO

The IIOUFO now has over 4,800 members world wide with a State Office in most all the 50 States, with 15 Foreign Representatives. The purposes of the IIOUFO are: 1. To collect and evaluate UFO reports, 2. To bring about a better understanding between civilian UFO study groups and the Air Force, 3. To expose researchers who distorted information and cast a bad light on the true scientific research of the subject, 4. To show the possibility that UFOs could be interplanetary spaceships.

MEMBERSHIP

Membership in the IIOUFO is free and open to all interested persons. Membership is composed of 1. Board of Director 2. Technical Advisory Board, 3. Photo analysts, 4. District and Foreign Representatives and 5. Members.

IIR

This is your first issue of "The Interplanetary Intelligence Report", which will be published bi-monthly, (3.00 per year) ppd. Members of the IIOUFO aren't required to subscribe.

FUTURE ISSUES

Future issues of the IIR will carry many interesting articles, UFO sightings and the results of our investigations, as well as newspaper clippings and photographs.

Also each issue will carry an article by the Oklahoma Science and Arts Foundation, Kirkpatrick Planetarium, in Oklahoma City.

COOPERATION

The IIOUFO will work with all organizations and persons interested in solving the UFO mystery. If you have any questions about IIOUFO would like to become one of our representatives, or report a UFO sighting, please feel free to get in touch with us.

NOTE

Please fill out the chart on page 5 and return so we can tell what you thought and what you want more of.

NOTICE

EVERYONE IS INVITED TO THE UFO LECTURE BY HAYDEN HEWES, ASSOCIATE DIRECTOR IIOUFO AT 8:00 PM ON FRIDAY APRIL 16 AT THE NEW AGE CENTER, 145 N.E. 14TH ST. OKLAHOMA CITY, OKLAHOMA.

All photo work in this issue is courtesy D. V. Critchfield.

Hayden C. Hewes

W. F. RIEFER

Director

INTEREST

I became interested in the subject of Unidentified Flying Objects during the War Years, but did not become active until 1947. I followed the subject of Ufology with great interest, in 1957, Hayden and I put an idea on paper and the IIOUFO emerged.

PUBLICATION

"The Interplanetary Intelligence report" has been on the drawing boards since 1957. I hope that it will be of interest to all persons interested in scientific study of Ufology.

IIR

The IIR will separate fact from fiction. We will publish UFO reports and the results of our investigations.

OPINION

As for myself, I have never sighted a "flying saucer" but on one occasion did observe a large unidentified flying object with many other persons. I am of the opinion that UFO's are real, but just what they are, and where they come from is the mystery.

WELCOME

I will welcome your opinion on this subject, and will talk with anyone who thinks they might have a solution to this mystery.

H. C. HEWES

Associate Director

The IIOUFO was an idea in 1957. In 1958 the idea had materialized into a scientific research organization. Today, over 4,800 strong we are adding what information we can to the UFO mystery.

As for my personal opinions, space does not permit me to make a detailed statement, but the possibility of interplanetary origin is possible.

AIR FORCE

By special authorization from the Pentagon last September 8, 1964, I visited the Air Force UFO Investigation headquarters located at Wright-Patterson AFB, Ohio. Future issues of the IIR will include articles and photographs of my visit. This August I will visit NASA at Houston to see the development of the U.S. space program.

RARE

Last November 6, Oklahoma City had a rare visitor from space. An article with photograph will be forthcoming.

MYSELF

I have been interested in UFO since 1957. At the present time I am working at Central Merchandise Co. and majoring at the University of Okla. in aerospace.

J. MANEY
Deputy Director

I'm Jim Maney, Deputy Director of the IIOUFO. I have been in the organization almost since it was organized long ago in 1958. My interest in the UFO goes back farther than that by about a year. I really don't have any firm opinions on their origin. To me, the interplanetary hypothesis is tenable, and if it has been disproven, I am ignorant of that fact. But I wouldn't recommend anyone putting money that particular theory. Any UFO organization (and there are precious few of the greats of the mid-1950's left) which sets itself up to prove one particular thesis is, to my mind, violating the tenets of scientific research. That is why IIOUFO has always insisted on a strict organizational neutrality concerning any thinking on the "ultimate question" of ufology.

FUTURE

Me personally? In May, I graduate from the University of Dallas with a *cum laude* B.A. in History. This fall, I will enter the University of Notre Dame to do graduate work with a fellowship. As my time permits, I hope to do articles in this publication on topics in the UFO field which have interested me in my work. We in IIOUFO solicit the support of all those interested in this, the greatest enigma of our age. We hope, Bill, Hayden, Vic and I, with a mighty assists from many of you, to perhaps do our part in solving this question of the UFO, the "riddle of the heavens".

NOTICE

EVERYONE IS INVITED TO THE UFO LECTURE BY HAYDEN HEWES, ASSOCIATE DIRECTOR IIOUFO AT 8:00 PM ON FRIDAY APRIL 16 AT THE NEW AGE CENTER, 145 N.E. 14th STREET, OKLAHOMA CITY OKLAHOMA.

Watch for the OKLAHOMA RESEARCH ASSOCIATION, a division of the Interplanetary Intelligence of UFO. Coming soon.

VICTOR C. JOHNSTON
Secretary

One autumn day in 1944, I noticed at a local bookstore a copy of *Amazing Stories* featuring "I Remember Lemuria," by Richard S. Shaver. Thus was I introduced to the "Shaver Mystery", a most controversial subject.

Being interested in the unusual, I followed the subject very closely, reading every story and article pertaining to this matter. I carried on extensive correspondence with other researchers.

UFO'S NO STRANGERS

Having been "broken-in" by the "Shaver Mystery", I was not surprised by the announcement of the Kenneth Arnold sighting on June 24, 1947. This, I thought is something to be followed very closely.

Therefore, early in 1960, I took over the directorship of the INTER CONTINENTAL AERIAL RESEARCH FOUNDATION, a world-wide research group founded by W. T. Jordan of Milwaukee, Wisc. Due to financial reasons I had to put the organization in mothballs.

However, the organization is now being re-activated, under a new name, the INTERNATIONAL AEROSPACE PHENOMENA RESEARCHERS. IAPR is presently recruiting new members throughout the world.

Kirkpatrick Planetarium

DALE JOHNSON
Assistant Planetarium Director

Only a few decades ago the word "planetarium" was a strange and little understood sound in the ears of the populace, for only a handful existed in the entire world. Only a few planetariums were in operation in the United States on the East and West Coasts. Today, hundreds of planetariums exist in towns small and large all over the U.S. and Oklahoma City is no exception. Now Oklahomans can visit The Oklahoma Science Arts Foundation Building at Fair Park, "under the blue dome".

In slightly over two years of operation the Kirkpatrick Planetarium has served the community in many capacities both culturally and educationally. Thousands of young people from pre-schools through high school have passed through the doors of the planetarium to watch and listen as the wonders of the universe unfold before them; but the planetarium is more than a circular room forty feet in diameter with a domed ceiling forty feet high. We think you'll agree that the planetarium is one of the greatest aids to education and culture ever devised, for it is not confined to the realm of the stars, but can be directly applied to the study of the realm of man and his struggle for knowledge and enlightenment.

We feel that you will acknowledge the value of the planetarium to the community and we cordially invite you to join us in the "Theatre of the Sky," the Kirkpatrick Planetarium, Oklahoma Science and Arts Foundation, Fair Park, Oklahoma City.

NOW BEING PRESENTED:

"What Time Is It?"

A fascinating history of the keeping of time. Public showings at 2:15 p.m. 3:30 p.m. and 7:45 p.m. Saturdays, and 2:15 p.m. and 3:30 p.m. Sundays.

UFO Lands?

UFO LANDS AT BROOKSVILLE

By Joan Whitenour
East Coast Headquarters
IIOUFO 6464
34 Ave. N. St.
Petersburg, Fla.

Mr. John Reeves, a resident of a trailer park near here told of seeing a flying saucer with a robot-like pilot, which he first saw while taking a walk in the woods.

He described it as being about 700 yards away and it was bluish-green and reddish-purple in color, about 20 to 30 feet in diameter with two windows on top. The windows, he said, were about two ft. in diameter. It stood on a four-legged landing gear about four ft. high with a top about six feet thick.

ENCOUNTERS PILOT

Reeves described the robot thusly: "About five feet tall with a human-like figure. Wearing a canvas-like suit of a gray-silver color with a glass dome helmet. He said the eyes were farther apart than a normal human's and its chin more pointed, but added this could have been caused by glass distortion. He pulled something from his left side, lifted it to chin level and it flashed. He flashed again and I took off from the bushes. As I ran my glasses fell off and I just lay there. He flashed the thing again and walked back to his saucer." "There was some kind of opening under the saucer and he got inside." Reeves said the opening had round, cylindrical steps leading up into it.

LEAVES EVIDENCE

After he was inside some blades on the rim of the saucer started to move like venetian blinds. They opened and closed. Then the rim started going around — counter-clockwise — made a whooshing sound and then started going around faster. Then the gear retracted into the saucer and the saucer went straight up. "I watched it and it was out of sight in less than 10 seconds." Reeves said that the robot dropped two pieces of paper on his way back to the saucer. This evidence was found and turned over to the Air Force investigators. Reeves said the paper was like tissue, but very strong. The papers were about 14 inches long and about 8 inches wide.

The saucer left holes about "four inches in diameter and four inches deep." The robot-like pilot left footprints which he described as being "round on both ends and very narrow in the middle."

BACKED BY NEIGHBORS

I did some intensive investigation into the Brookville affair, and I found that the home-townners are solidly behind Mr. Reeves. They believe that he really saw what he says he did. This landing is unique in that evidence was left behind in the form of the two pieces of paper. It is my guess, and many others, that we will all grow long, gray beards before we hear any official confirmation either on the landing or the evidence of the papers.

Photo credit: St. Petersburg Times, March 5, 1965.

AIR FORCE CONCLUSION: Hoax

The alleged spaceship landing at Brookville on March 2, was officially termed a hoax by the Air Force.

The sighting-landing was investigated by MacDill Air Force Base personnel and by Dr. C. W. Bemiss, Pan American Airways technical staff man.

The Air Force found it "extremely doubtful" that a 20-30 foot object could have taken off at the alleged rate of 5,000 MPH in vertical ascent and been seen for any more than five seconds.

The vehicle would have reached an altitude of 36,430 feet in that time. There was also no evidence of blast-off.

Reeves's sketch of the vehicle showed four stilt poles for landing gear, which protruded at an angle. However, the four holes found in the ground were straight and appeared to have been dug.

No radioactivity was found in the area.

The two "space papers" were found to be composed of fibers common all over the world and corresponded to the fibers used for lens tissue or stencil paper. The hieroglyphics found on the paper were deciphered to read: "Planet Mars—are you coming home soon—we miss you very much—why did you stay away too long." Tests on the paper were conducted at the Institute of Paper Chemistry, Appleton, Wis.

Reeves statement after hearing the Air Force conclusion stated: "Maybe the saucer and the robot came from another country on this earth that's smarter than us. I never believed in flying saucers before, but I do now. The Air Force is just trying to shut this whole thing up."

See photographs in the July issue of the Interplanetary Intelligence Report of the landing holes made by the craft, a photograph of the footprints left behind by the Alien and photo of the two pieces of paper that were also left behind.

APRIL 24, 1964, Socorro, New Mexico

APRIL 24, 1964, Socorro, New Mexico

On April 24, 1964, a Socorro, New Mexico police, Mr. Lonnie Zamora, reported an object on the ground a mile south of the town at approximately 5:30 p.m. Lonnie Zamora said the object was white, egg-shaped and supported on girlerlike legs. He heard a roar and saw smoke and flames coming from underneath the object. The UFO rose to a point about 15-20 feet above the ground and the flames and smoke ceased. The UFO remained stationary for several seconds and then flew off in a southerly direction.

The Air Force sent investigators from Wright-Patterson AFB to Socorro. The investigation disclosed the following facts. No other witnesses to the object could be located. There were no unidentified helicopters or aircraft in the area. Observers at radar installations observed no unusual or unidentified blips. There was no unusual meteorological activity. There was no evidence of markings of any in the area other than the shallow depressions at the landing site. Laboratory analysis of the foreign material or radiation above normal. Laboratory analysis of the burned brush showed no chemical which would indicate a type of propellant. Air Force conclusion: "Unknown". The AF is continuing its investigation and the case is still open.

CIVILIAN UFO RESEARCH

New Age Center

E.S.P. Experiments Now Being Carried On At The Oklahoma City New Age Center.

The New Age Center of Oklahoma City has become a gathering point for people throughout this area who are interested in E.S.P. and Metaphysics and many other subjects which cannot ordinarily be discussed with the neighbors or oftentimes even close personal friends. (This last would include Flying Saucers)

BEGINNING

As a matter of fact the idea for the "Center" grew out of the minds of a number of people who met at a Rhinehold Schmidt lecture here in Oklahoma many years ago.

LECTURES

Since that time most of the top names in the Flying Saucer field have lectured here at least once and some of them several times. A few of them I recall at the moment are Dan Fry, George Van Tassel, Wayne Aho, Otis Carr, Paul Woods, Hayden Hewes, Dr. Frank Stranges and there are many other who are not so well known.

WELCOME

The "Door" is always open, at the center to all comers and the lectures and classes offer a great variety to choose from no matter what ones tastes. It is located at 145 N.E. 14th Street and the phone number is CE 6-3886. Charles Rhoades is the acting director at the moment. Those who might be interested in receiving a monthly schedule on activities at the "Center" should write and request same.

ACTIVITIES

One of the most popular activities at the moment is the Monday evening meetings where personal problems (Desire to lose weight, to quit smoking, etc.- are dealt with through hypnosis and later in the evening time travel, age regression and other types of E.S.P. experiments are conducted. I suggest you try it.

NOTICE: EVERYONE IS INVITED TO THE UFO LECTURE BY HAYDEN HEWES, ASSOCIATE DIRECTOR IIOUFO AT 8:00 PM ON FRIDAY, APRIL 16th, AT 145 N.E. 14th OKLAHOMA CITY, OKLAHOMA.

Don't forget to read the April issue of **FLYING SAUCERS**, page 6-15, and page 76, 78 and 80-83.

This is to announce that the Inter-Continental Aerial Research Foundation is being reactivated and reorganized. It is hereafter to be known as INTERNATIONAL AEROSPACE PHENOMENA RESEARCHERS (IAPR). We are in need of personnel to man observer posts, for purpose of spotting and tracking unconventional aerial objects. Also needed are researcher, special investigators, public relations people, State Coordinators, photograph analysts, and persons with college or university degrees (B.A. or higher) in the sciences or engineering for our Scientific Panel. Members will receive "The Tracking Station", a quarterly publication featuring sightings, landings and related incidents, and news of Terran space efforts. For further and more detailed information on IAPR, its purposes and policies, along with membership requirements, write to Victor C. Johnston, Director IAPR, 3300 N. Bryant, Oklahoma City, Oklahoma.

WHAT DO YOU THINK?

The chart below identifies the features in this report. After you have read it, please fill in the appropriate boxes with check-marks and return. This will give us an idea of what you thought about our first issue.

Investigation Results

Navy Radar Spots

Mystery Object

WASHINGTON, Jan. 5 (AP). —The Air Force is investigating the reported sighting of two high-speed unidentified flying objects by Navy radar operators at Patuxent Naval Air Station, Md.

The Navy said Tuesday that the operators observed "two objects on their scope approaching at approximately 4800 miles an hour from 30 to 40 miles south" of the base at 8:30 P.M. Dec. 29.

The objects approached the naval air station, executed a tight turn and disappeared from the scope, the Navy said.

About the fastest aircraft in existence is the X-15 experimental plane which has flown at 4104 miles an hour. The X-15 is based on the West Coast. It has a very short range.

IIOUFO's investigation into the reported sighting determined that false radar targets were mistakenly reported as UFO's on 29 December 1964. Study of the shape and illumination of the return indicates that they were created by some other electronic device within the station or were caused by an intermittent abnormality within the circuitry of the radar set itself. This conclusion has been further verified by a check with an independent radar complex at Patuxent NAS and with adjacent radar sector centers on the East coast which revealed no corresponding radar return on that date.

GT-1

IIOUFO's investigation into the report of four UFO's and the GT-1 launch. "No unidentified objects were observed accompanying or pursuing the GT-1 spacecraft, launched into orbit on April 8, 1964. Objects observed which were detected on radar, have been identified as minor structural pieces which routinely break free from the expendable booster section in the spacecraft and booster separation process. There is no indication of the presence of any material that was not part of the launched vehicle."
